Interdisciplinary Assessment Clinic

What is an Interdisciplinary Assessment Clinic?

The Interdisciplinary Assessment Clinic has been designed to provide a more comprehensive assessment of complex chronic pain problems.

The healthcare team will assess and formulate a treatment plan as a team. Upon completion of the clinic, your family physician will be provided with further treatment advice with ongoing treatment.

What is the Purpose of this Clinic?

The purpose of the clinic is to provide a more comprehensive understanding of your problem and how it affects your life and work.

How Does the Clinic Work?

Patients selected for the clinic will be given an appointment for this comprehensive assessment. The appointment details are as follows:

Appointment #1 – An assessment with the following disciplines

- A specialist in Physical Medicine and Rehabilitation
- A medical doctor specialized in medication management / chronic pain
- A therapist

Duration: 3 hours

Appointment #2 – The therapist will implement the individualized exercise/ return to activity program and/or the physician will outline the treatment plan to you. This appointment will be booked after the three specialists have conferenced and developed your treatment plan. You will be contacted regarding this appointment.

Conditions That Can Be Managed:

- Chronic Pain Syndrome
- Fibromyalgia
- Chronic Soft Tissue Pain
- Myofascial Pain Syndrome
- Chronic Neck and Low Back Pain
- Complex Regional Pain Syndrome
